About Me

I'm Salim

A Student from Lyon

I'm 18 years old, I'm a student at La Martinière Monplaisir high school, I was born in Germany precisely in Düsseldorf so I speak a little German and also I speak (French, English) fluently especially on video games, by discussing with foreigners or simply by watching movies on the internet. During my vacations I took courses on the W3 website such as "python, javascript, html, css" where I learned programming languages, I also have a PIX certificate and I have a first aid certificate obtained in Tunisia.

My passion is to create websites using the new things I learned on the W3 site and to improve the web page.
